GLOBAL HEALTH

Jesus walked, taught and always healed.

We currently host medical and dental teams on a regular basis. We can do optical work and nutrition. We have a clinic in our community, and travel to different rural communities to serve where people cannot afford to see a doctor. Our medical teams help identify patients who need a more regularly scheduled care plan.

IMPROVING LIVES

Jesus preached the good news.

Families often cook on the floor, have no access to clean water, and live on dirt floors that promote an unhealthy environment, and schools have precarious conditions. Missionaries will be able to provide effective solutions and instilling dignity of all people through Ecofilters, Ecostoves, building concrete floors, teaching cooking, improving classrooms in different schools.

TRANSFORMING

Jesus visited his friends' homes and brought restoration

Missionary groups are diverse, and it is very common that while there are medical activities and projects, we carry out activities with people, especially young children. We can carry out vacation Bible schools, musical and reading activities, jewelry making, among many others that bring fellowship and transformation of the spirit. Here the missionaries also visit homes and pray for families, bringing hope and learning from the community.
